

ERIC

Putting ideas together

Epidemiological Resources and Investigation Consultancy Limited

Company Profile

About ERIC

Epidemiological Resources and Investigation Consultancy Limited is a public health consultancy firm that specializes in assisting clients with designing epidemiological studies and surveys, analyzing data from these studies as well as the reporting on these studies. The firm has a core and network of consultants that have strong capabilities in public health, epidemiology, nutrition, implementation science, sociology and biostatistics that employ high quality quantitative and qualitative research methods to deliver solutions to our clients needs.

Using best evidence and informed approach, we provide guidance in public health practice and program management. This allows our clients to achieve practical and cost-effective solutions.

Our services range from the simplest project requirements, such as basic advice to more complex project needs. As individual consultants and a corporate entity, ERIC Limited and its consultants have been involved with the planning, implementation and evaluation phases of a number of large-scale public health interventional and survey projects in Nigeria and other parts of the world.

We have the capacity, experience, network and resources to handle large community or household surveys with paper-based data collection tools or electronic platforms using handheld android devices.

Vision
